REPEAT NCI

RECORDS: DEALERS AND EXHIBITORS.

Each dealer, other than operators of auction sales and brokers to whom animals are consigned, and each exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning each dog or cat purchased or otherwise acquired, owned, held, or otherwise in his or her possession or under his or her control, or which is transported, euthanized, sold, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control.

***There is no disposition for the Patagonian Cavies. Need to keep complete records for all acquisitions and dispositions. To be corrected: 17 April 2004

*** There is minimal acquisition paperwork for the Java Macaque. Only name and address of individual the Macaque was received from was available. Need to obtain either the USDA license number or driver's license number and vehicle plate number of all animals obtained. To be corrected by: 17 April 2004

***There is no acquisition paperwork for the three Sugar Gliders present. Need to obtain either the USDA license number or the name, address, driver's license number and vehicle plate number of all animal obtained. To be corrected by: 17 April 2004

2.131 (b) (1)

HANDLING OF ANIMALS.

During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public.

*** Kiara is being housed on the tennis courts with the enclosure being secured only by a carabineer type clip. The tennis courts are next to the picnic area. The public barrier that is in place is a single rope hung between trees in this area. Given the location of the enclosure this is not an adequate public barrier to deter individuals from approaching the primary enclosure. This affects 1 animal. To be corrected by: 14 April 2004

OUTDOOR HOUSING FACILITIES.

Shelter from the elements. Outdoor housing facilities for nonhuman primates must provide adequate shelter from the elements at all times. It must provide protection from the sun, rain, snow, wind, and cold, and from any weather conditions that may occur.

***The Snow Macaque enclosure does not provide adequate shelter from the elements. The bottom of the sheltered area had standing water throughout it. The sheltered area only had two sides that are covered. This allows rain to enter it easily and does not provide protection. This affects two animals. To be corrected by: 25 April 2004.

3.125 (a)

FACILITIES, GENERAL.

(a) Structural strength. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

***The close down gate in large lion enclosure containing three lions is in disrepair. The female lion was chewing on the metal door track as we were conducting the inspection. The wooden portion of the door is in splinters. All structures must be maintained in good repair to prevent injury. This affects 3 animals. To be corrected by: 19 April 2004.

***The one wooden wall of the shelter box for the Himalayan Bears has been destroyed by the bears. All structures must be structurally sound and maintained in good repair. This affects 2 animals. To be corrected by 25 April 2004.

***The front Tiger enclosure that is housing three juvenile Tigers, approximately 1 year old and weighing about 125 Lbs is only about 8' in height. This is inadequate for Tigers of this size. Fence height needs to be sufficient enough so that it can contain those animals enclosed in it. This affects 3 animals. To be corrected by: 12 May 2004

I was accompanied by (b)(6), (b)(7)c

Last Inspection: 15 Oct 2003

Records Reviewed: 1) Program of Veterinary Care
2) Acquisitions/Dispositions

Note: Due to the unexplained recent animal deaths, any mammals that die in the future should be necropsied to determine the cause of death.
